SUNBELT RENTALS is one of the largest equipment rental companies in North America, with more than 525 locations and six specialty divisions. We are pleased to now offer a higher level of expertise and service through the Sunbelt Rentals Flooring Solutions division, the single largest provider of rental equipment to maintain indoor and outdoor surfaces. The new Flooring Solutions Division will continue to offer a broader range of products and services including:

- Long-term rental options (12+ months)
- Short-term rental additions (day/week/month)
- Battery, electric, LPG and diesel powered units
- Walk-behind and ride-on sweepers
- Walk-behind and ride-on scrubbers
- Outdoor sweepers and litter vacs
- Floor burnishers for polishing, grinding, scrubbing and wax removal
- Carpet extractors
- Specialty cleaning equipment for grout

While our general tool locations will continue to service the broader construction services markets, the Flooring Solutions division will focus on providing alternative solutions for a wide range of customers and industries:

- Automotive
- Aviation / Transportation
- Cleaning Professionals
- Education
- Food and Beverage
- Government Institutions
- Health Care
- Hospitality
- Manufacturing
- Mining
- Municipalities
- Pharmaceutical
- Retail
- Warehousing and Logistics

SWEEPERS

Ride-on sweepers are ideal for high production sweeping of indoor and outdoor surfaces. They offer excellent dust control, continuous uptime and powerful sweeping performance for efficient cleaning rates up to 150,000 sq. ft. per hour.

Walk-behind sweepers are ideal for picking up debris in indoor and outdoor applications. They deliver efficient cleaning results at rates up to 34,000 sq. ft. per hour and variable forward and reverse motions for excellent maneuverability.

SCRUBBERS

Ride-on scrubbers deliver maximized floor cleaning capacity at rates up to 70,000 sq. ft. per hour. They utilize dual polypropylene cylindrical brushes for aggressive scrubbing, with variable down pressure to match floor conditions.

Walk-behind scrubbers feature compact designs to easily reach tight and confined spaces in a variety of applications. Excellent down pressure and optimal water recovery leave floors clean, dry and safe. Sunbelt Rentals Flooring Solutions offers the ec-H2O option on all walk-behind and ride-on scrubbers.

OUTDOOR SWEEPERS/LITTER VACS

Municipalities, parking decks and airports rely on high-performance litter vacuums and street sweepers that deliver quiet, dependable outdoor cleaning in public spaces, any time of day.

VACUUMS

Clean almost anywhere, with a complete line of upright, backpack and canister vacuum cleaners from Sunbelt Rentals. Count on durable and versatile performance in a variety of applications, including heavy-duty, lightweight, single motor, dual motor, wet-dry and wide-area vacuum.

FLOOR BURNISHERS AND SPECIALTY MACHINES

Floor burnishers can be used to scrub, polish and strip almost any floor, even those with uneven surfaces. Multi-surface cleaners can restore tile, grout and other hard surfaces to original condition.

CARPET EXTRACTORS

Deep clean carpets with Sunbelt's heavy-duty carpet extractors, and remove surface stains and odors with interim carpet extractors. Sunbelt's full line of carpet cleaning equipment gives you a variety of options and maximum flexibility to clean in large or small spaces. Commercial carpet extractor designs include riders, pull back, forward push and spot extractor designs.

ec-H2O NANOCLEAN™ TECHNOLOGY

ec-H2O NanoClean™ technology electrically converts water into an innovative cleaning solution that cleans effectively, saves money and reduces environmental impact compared to daily floor cleaning chemicals. This converted water is created by an on board e-cell that generates millions of tiny microscopic bubbles, known as nanobubbles, that promote the cleaning efficacy of the solution. Activation of the ec-H2O cell negates the need to use detergent in the scrubbing process. This next generation solution offers the same benefits of the first generation and now cleans better by reducing soils in more applications.

THE RESPONSIBLE WAY TO CLEAN

In addition to delivering outstanding performance, ec-H2O NanoClean™ can create savings by:

REDUCING THE COST OF CLEANING

Delivers cost savings and productivity gains by using less water, which means fewer empty-fill cycles, significant chemical and labor cost savings, and simplified operation and maintenance.

ENHANCING FACILITY IMAGE

Effectively removes daily soils, as well as more stubborn soils like food greases, road salt and more, without leaving chemical residue.*

IMPROVING HEALTH AND SAFETY

Certified by the National Floor Safety Institute to improve floor traction and reduce the risk of slip and fall accidents.

MINIMIZING ENVIRONMENTAL IMPACT

Reduces the impact of cleaning operations on the environment in seven key categories, according to a third-party study by EcoForm.

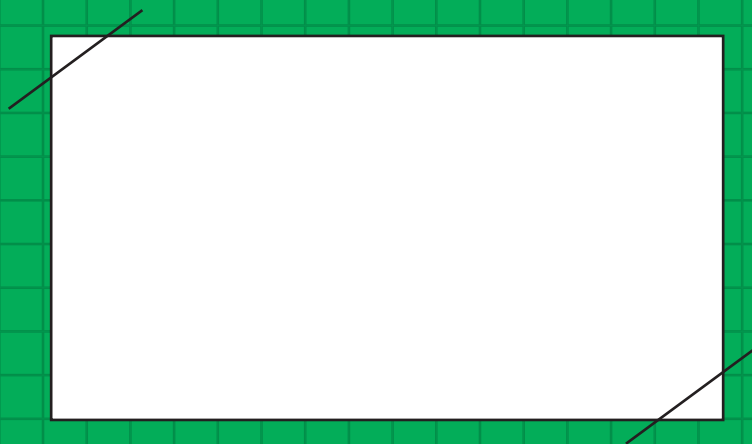

*ec-H2O NanoClean™ technology is not suitable for all soils, including heavy concentrations of fats and oils. Depending on the type of soil, conventional chemical cleaners may be required.
